

Using WebDAV to Upload Files from a Mac to HuskyCT

****Directions for Mac OS X 10.4 and later**

Basic Procedure

1. [Copy the WebDAV address](#)
2. [Connect to your site on the HuskyCT server](#)
3. [Drag and Drop files to the File Manager of your HuskyCT site](#)

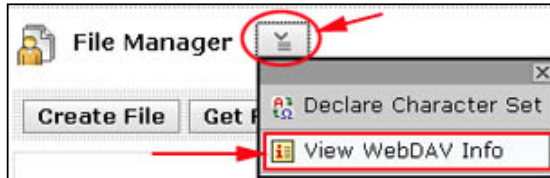

Detailed Instructions

Step 1: Copy the WebDAV address

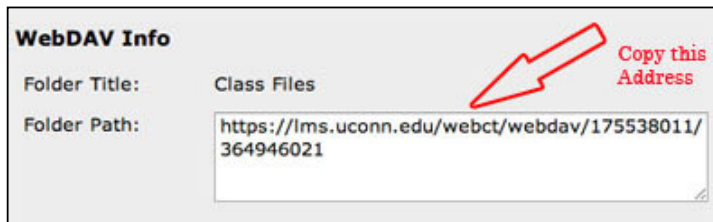

Go to File Manager from the Build tab

Click gray option menu icon
Select "View WebDAV Info"

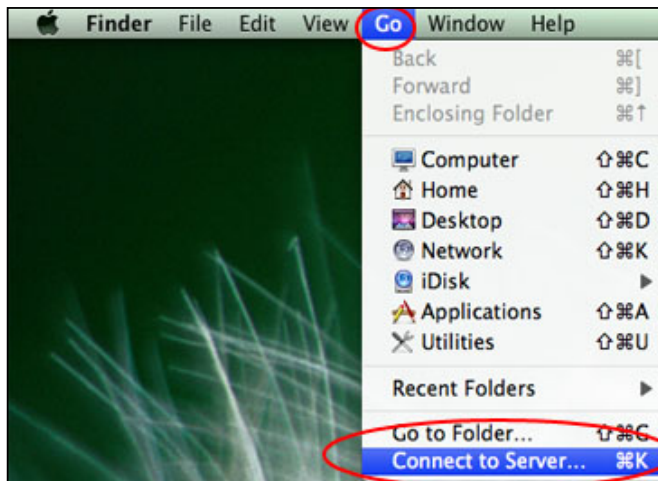

Copy the WebDAV Address

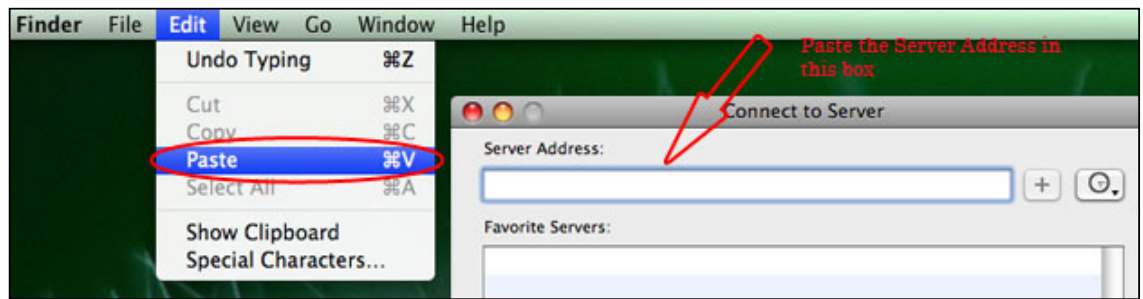

Step 2: Connect to your site on the

In Finder, select "Go" menu
Select "Connect to Server"

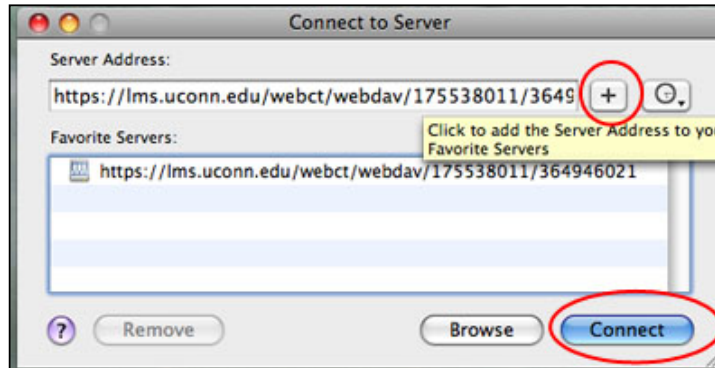

Paste the WebDAV info into the "Server Address" box

Click the "+" button

Click Connect button

This will add the address to the list of favorite servers

In the pop up box, type in your NetID and password

Click "OK"

Step 3: Drag and Drop Files to your HuskyCT site File Manager

Your drive will automatically mount in the finder.

You can now "Drag and Drop" files into this drive

The files will appear in the File Manager of your HuskyCT site
